

SUFFOLK CONSTRUCTION AWARDED
MIAMI DADE COLLEGE CLASSROOM/ STUDENT UNION FACILITY PROJECT

*Leading construction management firm will construct \$25 million facility
consisting of 110,000 square feet of new academic and support space*

MIAMI, FL; April 5, 2010—Suffolk Construction Company, Inc., recently announced it was awarded the Miami Dade College Wolfson Campus Classroom/Student Union facility project. The new \$25 million Classroom/Student Union facility will provide an additional 110,000 gross square feet of new academic and support space to the institution's Wolfson Campus. The SIX-story facility will include classrooms, FILM archival library, wellness center, student union/student life center, and a food court and general eating area.

The Suffolk project team will provide a comprehensive logistics plan that will help limit disruption to the campus and the city's ongoing activities and transportation system. The Miami Dade College campus is located in a congested, urban area with heavy pedestrian and vehicular traffic patterns, and the east property line is bordered by the Metro Mover.

The complicated building construction project will be an opportunity for Suffolk to begin building a strong relationship with Miami Dade College, and strengthen its design-build relationship with Zyscovich, the architect on the project. Construction is scheduled to begin in December of 2010 and will be completed in December 2011.

###

Founded in 1982, Suffolk Construction Company, Inc., is one of the leading privately held construction management firms in the country, with main offices in the northeast, mid-Atlantic, southeast and west coast regions of the country. Suffolk provides preconstruction, construction management, design/build and general contracting services, and has a strong reputation for delivering challenging building construction projects in the healthcare, education, science/technology, government and commercial sectors.

Suffolk's approach, capabilities and offerings are transforming the way clients achieve success in the construction industry. Suffolk has a commitment and passion for environmentally-friendly business practices and sustainable building, a focus on state-of-the-art technologies to support key processes, such as Building Information Modeling (BIM), and a creative and intensive approach to preconstruction planning which has resulted in higher quality and lower overall costs for clients.

Suffolk employees are experienced construction professionals and are committed to client service and relationship building. They are influencers in the construction industry and in their local communities, and consistently lead by example while striving to exceed expectations with clients, partners and the people and businesses in the surrounding neighborhoods.
